General Information

Who Is This Training For?

The SAFe: Product Owner / Product Manager (POPM) training is designed for professionals responsible for defining product needs, managing backlogs, and delivering value within large-scale agile environments. It is ideal for:

- Product Owners seeking to optimize backlog management within a SAFe framework.
- Product Managers responsible for defining the product vision and coordinating cross-team efforts.
- Business Analysts and other value chain members involved in product delivery.
- Scrum Masters or Agile Coaches wanting to understand the role of Product Owners/Managers.
- Agile transformation leaders seeking to better understand product dynamics in SAFe.

Prerequisite

No specific prior experience is required, but it is recommended to have:

- A basic understanding of Scrum concepts.
- Experience working in agile teams.
- Experience in leadership or facilitation roles is a plus.

Schedule and Teaching Methods

Schedule:

- Training from 09:00 AM to 5:30 PM over **2 days**.
- A 15-minute break in the morning and afternoon.
- A 1-hour lunch break.

Structure:

- 100% remote training with an open camera policy.
- Certificate of completion provided at the end of the training.
- Maximum of 20 participants per session.
- Registration: Open year-round, with spots allocated based on availability.
- Access Time: Training access is guaranteed within 7 days of registration.
- Certification: You have 30 days to complete the certification after the training ends.
- Our remote training is accessible to people with reduced mobility and those with disabilities.

Teaching Methods:

- *Theoretical Presentations: Interactive sessions introducing the key concepts of the SAFe framework.*
- *Case Studies: Real-world scenario analysis to illustrate the practical application of SAFe principles.*
- *Group Work: Collaborative exercises and simulations to reinforce hands-on learning.*
- *Q&A Sessions: Interactive exchanges with the trainer to answer questions and clarify concepts.*
- *Access to Documentation: Online resources, practical guides, and access to the SAFe community for continued learning after the training.*

Price

The cost of the SAFe PO/PM training is **1100 \$** (excl. VAT) per participant. This price includes:

- Access to training sessions.
- Educational materials and official SAFe documentation.
- Registration for the SAFe PO/PM certification exam.
- Post-training support and one-year membership in the SAFe community.

Programme de la formation

- Creating valuable features
- Managing the Program Backlog and Kanban

3

Chapter 3: Conducting PI Planning

- Communicating the vision
- Defining PI objectives
- Managing dependencies

Managing risks

4 **Chapter 4: Executing Iterations**

- Creating user stories
- Planning iterations
- Managing flow with the Kanban team
- Continuously refining the backlog
- Participating in iteration reviews
- Participating in retrospectives
- Supporting DevOps and Release on Demand

5 **Chapter 5: Executing the PI**

- Participating in PO Sync
- Participating in System Demos
- Innovating throughout the PI
- Inspecting and adapting

6 **Chapter 6: Preparing for the "SAFe® PO/PM" Certification Exam (Post-Training)**

- Mock exam with group review.
- The exam is taken online (within a maximum of one month) in French or English.

- Exam tips and an instructional video on how the exam works.
- After the training, participants receive a link to the Scaled Agile Academy website to take the exam.
- The exam consists of a 90-minute multiple-choice test with 45 questions.
- A minimum score of 73% is required to pass the exam.

Evaluation

During the training, the trainer evaluates participants' progress through quizzes, simulations, and practical exercises.

Participants complete a skills assessment before and after the training to validate their acquired competencies.

Training Objectives

- Understand the roles of Product Owner and Product Manager in SAFe.
- Prioritize and manage backlogs effectively.
- Create and maintain a clear product vision.
- Facilitate Program Increment (PI) Planning and execution.
- Collaborate with teams and stakeholders.
- Measure product performance and optimize value delivery.
- Use SAFe tools to optimize product management.
- Prepare for the SAFe® Product Owner/Product Manager certification exam.
