General Information

Who Is This Training For?

The SAFe Scrum Master (SSM) training is designed for professionals currently working or aspiring to work as Scrum Masters in large-scale agile environments. It is also suitable for:

- Current Scrum Masters looking to advance in a SAFe framework.
- Agile team managers who want to understand the responsibilities of a Scrum Master within SAFe.
- Agile team members aiming to take on a leadership role.

Prerequisites

No specific prior experience is required, but it is recommended to have:

- A basic understanding of Scrum concepts.
- Experience working in agile teams.
- Experience in leadership or facilitation is a plus.

Schedule and Teaching Methods

Schedule :

- Training from 09:00 AM to 5:30 PM over **2 days**.
- A 15-minute break in the morning and afternoon.
- A 1-hour lunch break.

Structure :

- 100% remote training with an open camera policy.
- Certificate of completion provided at the end of the training.
- Maximum of 20 participants per session.
- Registration: Open year-round, with spots allocated based on availability.
- Access Time: Training access is guaranteed within 7 days of registration.
- Certification: You have 30 days to complete the certification after the training ends.
- Our remote training is accessible to people with reduced mobility and those with disabilities.

Teaching Methods:

- Theoretical Presentations: Interactive sessions introducing the key concepts of the SAFe framework.
- Case Studies: Real-world scenario analysis to illustrate the practical application of SAFe principles.
- Group Work: Collaborative exercises and simulations to reinforce hands-on learning.
- Q&A Sessions: Interactive discussions with the trainer to clarify concepts and answer questions.
- Access to Documentation: Online resources, practical guides, and access to the SAFe community for further learning post-training.

Price

The cost of the SAFe Scrum Master (SSM) training is **1100** \$ (excl. VAT) per participant. This price includes:

- Access to the training sessions.
- Educational materials and official SAFe documentation.
- Registration for the SAFe Scrum Master certification exam.
- Post-training support and one-year membership in the SAFe community.

Program Overview

1 Chapter 1: Introduction

2 Chapter 2: Scrum in the SAFe Context

- Agile concepts.
- Core elements of Scrum.
- Positioning an Agile Team in a SAFe enterprise.

3 Chapter 3: The Role of the Scrum Master

- Responsibilities towards the team.
- Characteristics of an effective Scrum Master.
- Building high-performing teams.
- Facilitating team events.
- Coaching the Agile team with powerful questions.
- Collaborating with other teams.
- Resolving team conflicts.

4 Chapter 4: Program Increment (PI) Planning

- Preparation for PI Planning.
- Designing and reviewing PI Plans.
- Finalizing plans and establishing business value.
- Reviewing final plans.
- Facilitating an effective PI Planning event.

5 Chapter 5: Facilitating Iteration Execution

- Planning and tracking iteration progress.
- Refining the backlog.
- Facilitating iteration reviews.
- Promoting continuous improvement.
- Supporting DevOps.

6 Chapter 6: Completing a Program Increment

- Coaching the Program Increment iteration.
- Facilitating the inspection and adaptation workshop.

- Mock exam with group feedback.
- The exam is taken online (within a maximum of one month) in French or English.
- Exam tips and an instructional video on how the exam works.
- After the training, participants receive a link to the Scaled Agile Academy site, where they can take the exam.
- The exam is a 90-minute multiple-choice test with 45 questions.
- A minimum score of 75% is required to pass the exam.

Evaluation

During the training, the trainer assesses participants' progress through quizzes, simulations, and practical exercises.

Participants complete a skills assessment before and after the training to validate their acquired competencies.

Training Objectives

- Master the role of Scrum Master.
- Facilitate Scrum events.
- Coordinate with the Agile Release Train (ART).
- Facilitate Program Increment (PI) Planning.
- Manage obstacles and dependencies.
- Support team self-organization.
- Guide Lean-Agile practices.
- Prepare for the SAFe® SSM exam
